Ever stop to think that you have to wash dishes 3 times a day, 1095 times a year?

If you could save one-half the time devoted daily to dish-washing, we figure it would amount to about 15 days in a whole year. Rather startling, isn't it?

Sift a teaspoonful of GOLD DUST in a dishpan full of hot water, and it will wash your dishes in just half the time taken by the ordinary soap

Better still, it will give you cleaner, sweeter dishes—dishes that are not only clean on the surface, but that are sterilized and sanitarily safe.

The reason is that GOLD DUST is a positive antiseptic vegetable oil soap in powdered form; it goes deep into hidden places and routs every germ. It instantly dissolves in hot or cold, hard or soft water, and does all the hard part of the task without your assistance

Does not hurt the hands
